biology

an Open Access Journal by MDPI

Founding Editor-in-Chief

Prof. Dr. Chris O'Callaghan

Message from the Founding Editor-in-Chief

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Journal Rank** JCR - Q1 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
-  **Coverage by Leading Indexing Services** Scopus, SCIE (Web of Science), PubMed, PMC, AGRICOLA, CAPlus / SciFinder, and many other databases
-  **Rapid Publication** First decision provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2021)

Aims and Scope

Biology (ISSN 2079-7737) publishes reviews, research papers, and communications in all areas of biology and at the interface of related disciplines. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible.

The scope of *Biology* includes:

Behavior biology	Immunology	Biometrics
Biochemistry and molecular biology	Marine biology	Biological education and thinking
Bioinformatics	Microbiology	Infection biology
Biological engineering	Neuroscience	Cardiovascular biology
Biophysics	Pharmacology	Synthetic biology
Cell biology	Physiology	Cancer biology
Conservation biology and biodiversity	Plant science	Chemical biology
Developmental biology	Proteomics	Reproductive biology
Ecology	Structural biology	Astrobiology
Evolutionary biology	Systems biology	Toxicology
Genetics and genomics	Theoretical biology	Metabolism
	Zoology	
	Medical biology	
	Biotechnology	
	Climate change biology
